Thanks Jeremy. Facial recognition as well right?

None for the social media monitoring request, and none for the predictive software request.

Brian,

I ran out of time last night to respond to the requestor. I will have more time this afternoon. Can you guys remind me which ones have no responsive records?

Thanks,
Richard

Good morning Brian,

Just a recap regarding the PRA requests, here is the info we are releasing related to the BWC request. Attached are the three agreements for each vendor we've used, and the policy is available via our website link which is consistent with how we've handled similar requests. Other info coming on the other requests shortly.

Yes, here are the attached agreements that have been executed. LensLock was the only demo that we paid for; the others are free. If you need anything else, please let me know.

Jeremy,

Was there an agreement outlining the pilot program with Axon or any of the other vendors?

Thanks,
Richard

FYI Josh, I remember we answered part of this request before. Please see attached e-mail that I sent her in July of 2018.

In reference to #2, this is pretty vague and Richard may have addressed this same question previously. The pilot program is a continual review of several areas related to use of force, complaints, etc., but there are no formal records describing how the pilot study is being conducted. The slide that was presented to council is attached below and is the only documentation of then-anticipated review factors.

Richard/Andy, any different thoughts?

Hello,

Please see the request below wanting for policy records.

Thank you
